Lesson 02

Computer Network Devices

Networks: They are groups of people or things that are connected to each other for a common purpose.

Networks connection devices

1- Modem

- Connects a local area network (LAN) to the internet.
- Converts and transforms the signal from the ISP into a digital signal.
- Connects users to the internet.

2- Switches

- Send data to a specific device over a network.
- Makes connections easier and faster.
- Switches are intelligent devices.

Router

- Works as a gateway that connects computers to the ISP.
- Connects a modem to different networks.

Making connections

- Wired network use physical wiring and cables which are plugged into port on devices
- Wireless network connects without wiring (wireless or Wi-Fi)

Artificial intelligence (AI)

- Computer applications perform complex tasks that **simulate** the thinking and performance of the **human element**, such as the **ability to learn and reason**.

AI works to:

- **Imitate sound** when provided with the **tone of voice of an actual human being**.
- **Write an article on a topic** and inquire about **historical events and their sequence**.

Lesson 03

Technology and artificial intelligence (AI)

1- Virtual reality (VR)

Is a virtual 3-D environment that allow users to explore and interact with the surrounding, as if were reality.

- To experience VR

Users often wear a VR headset that blocks out the real world and provides view that immerses the user in another world.

- In the classroom, VR can take you to a world where insects and atoms are bigger than you.

It can take you a museum thousands of miles away, or to a historical site hundreds of years ago.

Ex: A VR online tour of the tomb of King Tut, that allows you to "walk" through the tomb.

2-Augmented reality (AR)

AR combines the real world with a virtual world by adding image using computers.

Augmented reality can be done through:

1- A smartphone camera

2- A tablet

This will show a 3-D model of what the real world looks like.

Ex: An AR shows you how new furniture will look in your house.

Students in a math class can point their smartphone camera at a flat surface and project a 3-D image like a cube or cylinder onto the surface.

AR helps students become active participants in learning and makes learning more memorable.

3-Artificial intelligence (AI)

The ability of the computer to think, learn and deduce.

- **For examples:**

- It predicts the word you will write from words you have written previously.

- AI is used to unlock your phone with facial recognition.

- A robot vacuum uses AI to avoid furniture and stairs.

➤ **Futuristic technology can improve the lives of people of determination.**

- Visually impaired people can use AR to see their family members up close.

- Disabled individuals can use visual assistant powered by AI to accomplish every task such as:

1- Making phone calls.

2- Navigating their computer using their voice or sign language.

Lesson 04

Evaluating cutting _edge technology

Cutting-edge technology

It is the latest and most advanced version of a service or product.

Reliable cutting-edge technology

1. Artificial intelligence (AI)
2. Augmented reality (AR)
3. Virtual reality (VR)

Assistive technology

- Helps people of determination Such as: -

1. Screen magnification software

2. Hearing aids

3. Programs that turn speech to text and text to speech

A visually impaired man uses a scanning and reading machine.

Cutting-edge technology has transformed life in ways that were unimaginable even a while ago.

In education

- It Improve lives and inclusion in society for people of determination, such as the assistive technology **smart glove** that empower deaf people to translate their sign in real time to spoken or text output.

User experiences

- It describes how to use the product and interact with it, and how to evaluate the experience, and it can be positive or negative.

➤ How to evaluate the product?

- Accessible:** Is it accessible for people of determination?
- Credible:** Are the company and its product trustworthy?
- Desirable:** Does the product meet your needs?
- Findable:** If there is an issue with the project or service can I find the solution.
- Usable:** Is it easy to use?
- Useful:** Is it practical?
- Valuable:** Does this product improve my life or help me learn?

Meeting need

- User experience is interlinked with the development or products and services.

Lesson 05

Digital research skills

Useful digital editing tools

Copy, paste and cut are some of the most commonly use word processing commands.

Digital search tools

1) Search engines

They help people to search internet websites based on the key words and phrases.

They're user-friendly, very fast, and often result in many results.

Ensure the content you select is credible and accurate.

2) Databases

- They are a collection of information which are typically stored in a computer system and can be accessed for free through your school.

- You can search for information from magazines and newspapers through the databases on the computer in school library.

Example of database: (EKB):

The EKB covers many subjects.

The result will be credible and accurate.

3) Library catalogs

- A library catalog is a database which includes all the items owned by a library.

- A library catalog search may include recently published books, including

e-books with the most recent research about a subject such as the catalog of the library of Alexandria.

Conducting a database search

- Use a keyword search.
- Review the results for subject heading and redo the search.
- You can use other database (author - journal title) field to narrow a search
- Limiting a search range by specifying dates (the most up-to-date research).

Lesson 07

Operating system

Operating System (OS)

- Is a software that manages a computer's functions, such as memory, drives, printers, and other accessible devices such as:

- **Screen readers**
- **Magnifiers**
- OS runs a computer's software and hardware, and allows a user to communicate with the computer easily.
 - Most computers come pre-loaded with an operating system.
 - Microsoft windows is on most computers worldwide
 - Apple computers run on mac OS

1 - Computer operating systems:**Microsoft Windows**

- It's the most popular worldwide.
- It uses closed-source software

MacOS

- It runs on Apple computers.
- It uses closed-source software

2 - Mobile operating systems:

Mobile devices have mobile operating systems.

- The most popular mobile OSs are android, and apple iOS, which is used on iPhone and iPad.
- Android uses open source software, which means a person can change and read the programming code.
- Apple iOS is closed; it can't be seen or change by the public.
- Both android and iOS perform the same basic functions, such as messaging, web access, video chat and touch function.

**Cutting _edge operating systems**

Other types of operating systems power different type of cutting-edge technologies.

For example:

- The Robot operating system (ROS) is an open _source used for building robot application.

- Multiple operating systems powering self-driving cars, including those developed by apple CarPlay and windows TM Automotive as well as individual car companies.

Programming language

Instructions to a computer are given in code.

- Over time, programming language have evolved from simple machine language (binary 0,1) to high level human like language.
- Computer language often shares similarities, so once you learn one; it is easier to learn other.
- Programming language are usually open source, anyone can see, modify or distribute the code.
- Programmers use hypertext markup language (HTML)to create web page.

HTML

Is commonly chosen for website creation because it is easy to learn and to use.

- It allows creators to add elements such as text, link, image, audio and even videos to their web pages.
- It easy to make change and it is compatible with all the major web browsers.

Lesson 08

Web design

Hyper Text Markup Language (HTML)

- It's the standard programming language used to create web pages.
- It describes the structure of a web page and consists of series of element

The building blocks of web pages are:

Web browser read HTML document and display the content according to the **HTML tag** .

Tags have three main parts:

Question 01

choose the correct Answer

- 1 converts the signal from the internet service provider (ISP) to a digital signal.
 - a Switch
 - b Motherboard
 - c Modem
- 2 Through networks you can transfer data with wires and cables.
 - a wireless
 - b wired
 - c Wi-Fi
- 3 Wired networks use physical wires which are plugged into
 - a ports
 - b TV
 - c Wi-Fi
- 4 perform complex tasks that simulate the thinking and performance of the human element.
 - a ISP
 - b AR
 - c AI
- 5 is/are a group of devices or things that are connected to each other for a common purpose.
 - a Routers
 - b Networks
 - c Software
- 6 The modem converts the signals from the into a digital signal.
 - a LAN
 - b Computer
 - c ISP
- 7 Cables and wires in wired networks are plugged into holes called
 - a modems
 - b switches
 - c ports
- 9 works by imitate voices by providing them with a natural human tone.
 - a Programming
 - b Artificial intelligence
 - c A network
- 10 are intelligent devices that send data to a specific device over a network.
 - a Switches
 - b Modems
 - c Hubs
- 11 are devices that can be connected to the internet.
 - a Computers
 - b Smart mobiles
 - c All of them
- 12 A is a device that connects a local area network to the internet.
 - a modem
 - b switch
 - c server

- 13 Wireless networks are also known as
- (a) cables (b) LAN (c) Wi-Fi
- 14 combines the real world with a virtual world by adding images using computers.
- (a) Virtual reality (b) Augmented reality (c) Both a & b
- 15 is used to unlock your phone with facial recognition.
- (a) Artificial intelligence (b) Virtual reality (c) Augmented reality
- 16 is a virtual 3-D environment that allows users to explore and interact with the surroundings as if it were reality.
- (a) AI (b) Augmented reality (c) Virtual reality
- 17 Visually impaired people can use to see their family members up close.
- (a) scanners (b) Augmented reality (c) braille
- 18 A vacuum cleaner in the form of a robot uses to avoid furniture.
- (a) AI (b) AR (c) VR
- 19 Users often wear that blocks out the real world.
- (a) smart watches (b) glasses (c) VR headset
- 20 predicts the word you will write from words you have written previously.
- (a) AR (b) AI (c) VR
- 21 AR helps students become active participants in learning and makes learning more
- (a) boring (b) memorable (c) difficult
- 22 To experience virtual reality, users often wear
- (a) smart gloves (b) eye glasses (c) VR headsets
- 23 helps disabled individuals through using virtual assistants to make phone calls.
- (a) AI (b) AR (c) VR
- 24 In a math class, AR can project onto a flat surface.
- (a) 2-D shapes (b) 3-D images (c) text
- 25 Augmented reality can be done through a
- (a) tablet (b) VR headsets (c) printer
- 26 From the ways of technology evaluation tools
- (a) accessible (b) desirable (c) both of them

- 27 technology is considered as the latest and most advanced version of services or products.
- (a) Cutting-edge (b) Assistive (c) Traditional
- 28 Complicated and hard-to-use products result in user experiences.
- (a) positive (b) negative (c) neutral
- 29 From the examples of cutting-edge technology, artificial intelligence and
- (a) Virtual reality (b) Augmented reality (c) Both of them
- 30 empower deaf people to translate their signs in real time to spoken or text output.
- (a) Hearing aids (b) Screen readers (c) Smart gloves
- 31 If the product is practical and meets customer needs, the user experience will be
- (a) positive (b) negative (c) both of them
- 32 describes how to use the product and interact with it.
- (a) Virtual reality (b) Futuristic technology (c) User experience
- 33 Artificial intelligence, augmented reality, and virtual reality are examples of technology.
- (a) assistive (b) cutting-edge (c) simple
- 34 in user experience means the company and its products are trustworthy.
- (a) Accessible (b) Credible (c) Desirable
- 35 The users will have a experience if the product is easy to use.
- (a) negative (b) difficult (c) positive
- 36 are collections of information which are typically stored in a computer system and can be accessed.
- (a) Search results (b) Databases (c) Websites
- 37 To move content from one place to another, use the command.
- (a) Copy (b) Cut (c) Paste
- 38 help people search internet websites based on the keywords and phrases.
- (a) Search engines (b) Modems (c) Libraries
- 39 Search engines help people to search internet websites based on
- (a) keywords (b) phrases (c) both a and b

- 40 is an example of a general database which covers many subjects.
- (a) The EKB (b) Facebook (c) Google
- 41 A library catalog is a/an which includes all the items owned by a library.
- (a) search engine (b) database (c) blog
- 42 is a database which includes all the items owned by a library.
- (a) A search engine (b) A keyword (c) A library catalog
- 43 The EKB results are credible and
- (a) accurate (b) inaccurate (c) narrow
- 44 To get useful search results and to narrow your search, you can search by
- (a) Author name (b) journal title (c) both a and b
- 45 You can search for some books in the school library using
- (a) databases (b) an email (c) a printer
- 46 The most popular mobile OS is/are
- (a) Android (b) Apple iOS (c) both a and b
- 47 is open-source software used for building robot apps.
- (a) Windows (b) ROS (c) Microsoft Word
- 48 The runs a computer's software and hardware.
- (a) operating system (b) CPU (c) hardware
- 49 The programming code of can be changed by anyone.
- (a) iOS (b) Windows (c) Android
- 50 Programming languages have evolved from to human-like languages.
- (a) complex (b) binary (c) pictorial
- 51 HTML is with all the major web browsers.
- (a) compatible (b) incompatible (c) irrelevant
- 52 A is a cutting-edge technology that uses a specialized OS.
- (a) calculator (b) self-driving car (c) typewriter
- 53 All the following are operating systems, except
- (a) Android (b) macOS (c) Google

- 54 is used on both iPhone and iPad.
- (a) Android (b) Windows (c) Apple iOS
- 55 It is difficult to use the computer device and mobiles without
- (a) emails (b) operating systems (c) flash memory
- 56 gives commands to the computer in the form of codes that can be used to create animation.
- (a) Programming language (b) assistive technology (c) digital footprint
- 57 is a mobile operating system.
- (a) ROS (b) macOS (c) iOS
- 58 is the standard programming language used to create web pages.
- (a) Python (b) HTML (c) OSs
- 59 HTML describes the structure of a web page and consists of a series of elements such as headings, paragraph and
- (a) images (b) links (c) both a and b
- 60 HTML tags consist of an opening tag, a closing tag and
- (a) comments (b) the content (c) attributes
- 61 The HTML tag `<p>.....</p>` refers to
- (a) largest heading (b) subheading (c) create a paragraph
- 62 The tag is used to create the largest heading in HTML
- (a) `<L1>.....</L1>` (b) `<h1>.....</h1>` (c) `<h6>.....</h6>`
- 63 Large headings are placed at the of the web page to catch the attention.
- (a) middle (b) bottom (c) top
- 64 To make the text bold in HTML, you can use tag .
- (a) `<p>` (b) `` (c) `<s>`
- 65 Adding to the web page, attracts attention and triggers different emotions.
- (a) images (b) smallest heading (c) database
- 66 The abbreviation of Hyper Text Markup Language is
- (a) HTML (b) HTLM (c) THML

Question 02

put (√) or (×)

- 1 To connect devices without cables, we use wired networks. ()
- 2 Computer networks connect computers together to share important information and data. ()
- 3 Devices can be connected without wiring. ()
- 4 Switches don't send data to specific devices. ()
- 5 Wired networks use Wi-Fi to connect devices. ()
- 6 Switches help to make connections easier and faster. ()
- 7 Computers don't need network connection devices to transfer data. ()
- 8 A modem is a device that connects a LAN to the internet. ()
- 9 Wireless networks connect devices with physical wiring and cables. ()
- 10 ISPs provide signals that modems convert into digital signals. ()
- 11 Cables in wireless networks are plugged into holes called ports. ()
- 12 AI is unable to imitate the sounds of people by providing a tone of actual people. ()
- 13 Switches are intelligent devices. ()
- 14 AI applications can write an article on a topic. ()
- 15 Virtual reality can show a 3-D model of what the real world looks like. ()
- 16 Artificial intelligence is the computer's ability to think, learn, and deduce. ()
- 17 Virtual reality is a 3D environment that interacted with by wearing glasses. ()
- 18 Virtual reality combines the real world with a virtual world by adding images using computers. ()
- 19 Virtual reality is a virtual 3-D environment. ()
- 20 Futuristic technologies can't help people with disabilities. ()
- 21 Users often wear VR headsets that block out the real world. ()
- 22 Future technology can improve daily life. ()
- 23 Augmented reality helps students become active participants in learning. ()

- 24 There is no difference between augmented reality and virtual reality. ()
- 25 Augmented reality can be done through mobiles and tablets. ()
- 26 An AR app can show you how new furniture will look in your house. ()
- 27 Disabled individual can use virtual assistants to make phone calls. ()
- 28 Assistive technology helps people of determination integrate in society. ()
- 29 User experience is always positive. ()
- 30 Smart gloves are a type of assistive technology. ()
- 31 Cutting-edge technology has transformed life in ways that were unimaginable even a decade ago. ()
- 32 User experience doesn't describe how to use the product. ()
- 33 Cutting-edge technology is the latest and most advanced version of a service or product. ()
- 34 If the product is pleasant to look at and interact with, this makes the user experience positive. ()
- 35 The development of products and services doesn't affect the user experience. ()
- 36 Smart gloves empower blind people to translate their sign to spoken or text output. ()
- 37 Cutting-edge technology helps people of determination. ()
- 38 User experience can be positive if the product is practical. ()
- 39 Usable product means the product is difficult to use. ()
- 40 Copy, Cut, and Paste are from digital editing tools. ()
- 41 EKB is an example of an unreliable website and is a database. ()
- 42 Databases can be accessed for free through a school. ()
- 43 A library catalog is a database which includes all the items owned by a library. ()
- 44 All digital search tools give similar results. ()
- 45 You choose the search tool based on the type of results you need. ()
- 46 You can use the library's website on the internet. ()
- 47 General databases provide information on a specific topic. ()
- 48 Be sure the search result you select is credible and accurate. ()

- 49 Author and journal title can be used to widen a search range in databases. ()
- 50 Search engines are user-friendly, very fast, and often give many results. ()
- 51 An operating system only manages a computer's software. ()
- 52 Android runs on Mac devices. ()
- 53 The ROS is closed-source software used for building robot applications. ()
- 54 Android is an open-source operating system. ()
- 55 Windows is open-source software that can be edited by anyone. ()
- 56 HTML is commonly used to create web pages. ()
- 57 Apple computers run on the Windows operating system. ()
- 58 Most computers come pre-loaded with an operating system. ()
- 59 Android operating system is used in iPhone and iPad. ()
- 60 Apple Car play is an operating system for self-driving cars. ()
- 61 Apple iOS uses closed-source software. ()
- 62 Similarities between programming languages facilitate learning them. ()
- 63 Self-driving cars don't need operating systems to perform. ()
- 64 Programming languages are usually closed sources. ()
- 65 HTML isn't compatible with the major web browsers. ()
- 66 The building blocks of web pages include only headings and paragraph. ()
- 67 HTML tags consist of two main parts. ()
- 68 The HTML tag `<h6> ... </h6>` refers to large heading. ()
- 69 The tag `<p>....</p>` is used to change text to bold. ()
- 70 The tag `<i> </i>` refers to change text to italic. ()
- 71 A paragraph usually has more than one sentence. ()
- 72 Web browsers have difficulty reading HTML documents. ()
- 73 We use the tag `<a> ` to create hyperlink. ()
- 74 Subheadings font size is larger than the heading. ()

- 75 Adding subheadings to web pages makes the text easy to scan, so a reader can find the information easily. ()
- 76 The tag <h1> </h1> refers to subheading. ()
- 77 HTML code can help people with low vision to distinguish between parts of a web page. ()
- 78 To change the text to bold we use the tag. ()
- 79 HTML elements break up web pages to make them easier to scan, read, and navigate. ()
- 80 Web browsers read HTML documents and displays the content according to the HTML tag. ()

Question 01

choose the correct Answer

- 1 converts the signal from the internet service provider (ISP) to a digital signal.
 - a Switch
 - b Motherboard
 - c **Modem**
- 2 Through networks you can transfer data with wires and cables.
 - a wireless
 - b **wired**
 - c Wi-Fi
- 3 Wired networks use physical wires which are plugged into
 - a **ports**
 - b TV
 - c Wi-Fi
- 4 perform complex tasks that simulate the thinking and performance of the human element.
 - a ISP
 - b AR
 - c **AI**
- 5 is/are a group of devices or things that are connected to each other for a common purpose.
 - a Routers
 - b **Networks**
 - c Software
- 6 The modem converts the signals from the into a digital signal.
 - a LAN
 - b Computer
 - c **ISP**
- 7 Cables and wires in wired networks are plugged into holes called
 - a modems
 - b switches
 - c **ports**
- 9 works by imitate voices by providing them with a natural human tone.
 - a Programming
 - b **Artificial intelligence**
 - c A network
- 10 are intelligent devices that send data to a specific device over a network.
 - a **Switches**
 - b Modems
 - c Hubs
- 11 are devices that can be connected to the internet.
 - a Computers
 - b Smart mobiles
 - c **All of them**
- 12 A is a device that connects a local area network to the internet.
 - a **modem**
 - b switch
 - c server

- 13 Wireless networks are also known as
- (a) cables (b) LAN (c) **Wi-Fi**
- 14 combines the real world with a virtual world by adding images using computers.
- (a) Virtual reality (b) **Augmented reality** (c) Both a & b
- 15 is used to unlock your phone with facial recognition.
- (a) **Artificial intelligence** (b) Virtual reality (c) Augmented reality
- 16 is a virtual 3-D environment that allows users to explore and interact with the surroundings as if it were reality.
- (a) AI (b) Augmented reality (c) **Virtual reality**
- 17 Visually impaired people can use to see their family members up close.
- (a) scanners (b) **Augmented reality** (c) braille
- 18 A vacuum cleaner in the form of a robot uses to avoid furniture.
- (a) **AI** (b) AR (c) VR
- 19 Users often wear that blocks out the real world.
- (a) smart watches (b) glasses (c) **VR headset**
- 20 predicts the word you will write from words you have written previously.
- (a) AR (b) **AI** (c) VR
- 21 AR helps students become active participants in learning and makes learning more
- (a) boring (b) **memorable** (c) difficult
- 22 To experience virtual reality, users often wear
- (a) smart gloves (b) eye glasses (c) **VR headsets**
- 23 helps disabled individuals through using virtual assistants to make phone calls.
- (a) **AI** (b) AR (c) VR
- 24 In a math class, AR can project onto a flat surface.
- (a) 2-D shapes (b) **3-D images** (c) text
- 25 Augmented reality can be done through a
- (a) **tablet** (b) VR headsets (c) printer
- 26 From the ways of technology evaluation tools
- (a) accessible (b) desirable (c) **both of them**

- 27 technology is considered as the latest and most advanced version of services or products.
- (a) Cutting-edge (b) Assistive (c) Traditional
- 28 Complicated and hard-to-use products result in user experiences.
- (a) positive (b) negative (c) neutral
- 29 From the examples of cutting-edge technology, artificial intelligence and
- (a) Virtual reality (b) Augmented reality (c) Both of them
- 30 empower deaf people to translate their signs in real time to spoken or text output.
- (a) Hearing aids (b) Screen readers (c) Smart gloves
- 31 If the product is practical and meets customer needs, the user experience will be
- (a) positive (b) negative (c) both of them
- 32 describes how to use the product and interact with it.
- (a) Virtual reality (b) Futuristic technology (c) User experience
- 33 Artificial intelligence, augmented reality, and virtual reality are examples of technology.
- (a) assistive (b) cutting-edge (c) simple
- 34 in user experience means the company and its products are trustworthy.
- (a) Accessible (b) Credible (c) Desirable
- 35 The users will have a experience if the product is easy to use.
- (a) negative (b) difficult (c) positive
- 36 are collections of information which are typically stored in a computer system and can be accessed.
- (a) Search results (b) Databases (c) Websites
- 37 To move content from one place to another, use the command.
- (a) Copy (b) Cut (c) Paste
- 38 help people search internet websites based on the keywords and phrases.
- (a) Search engines (b) Modems (c) Libraries
- 39 Search engines help people to search internet websites based on
- (a) keywords (b) phrases (c) both a and b

- 40 is an example of a general database which covers many subjects.
- (a) The EKB (b) Facebook (c) Google
- 41 A library catalog is a/an which includes all the items owned by a library.
- (a) search engine (b) database (c) blog
- 42 is a database which includes all the items owned by a library.
- (a) A search engine (b) A keyword (c) A library catalog
- 43 The EKB results are credible and
- (a) accurate (b) inaccurate (c) narrow
- 44 To get useful search results and to narrow your search, you can search by
- (a) Author name (b) journal title (c) both a and b
- 45 You can search for some books in the school library using
- (a) databases (b) an email (c) a printer
- 46 The most popular mobile OS is/are
- (a) Android (b) Apple iOS (c) both a and b
- 47 is open-source software used for building robot apps.
- (a) Windows (b) ROS (c) Microsoft Word
- 48 The runs a computer's software and hardware.
- (a) operating system (b) CPU (c) hardware
- 49 The programming code of can be changed by anyone.
- (a) iOS (b) Windows (c) Android
- 50 Programming languages have evolved from to human-like languages.
- (a) complex (b) binary (c) pictorial
- 51 HTML is with all the major web browsers.
- (a) compatible (b) incompatible (c) irrelevant
- 52 A is a cutting-edge technology that uses a specialized OS.
- (a) calculator (b) self-driving car (c) typewriter
- 53 All the following are operating systems, except
- (a) Android (b) macOS (c) Google

- 54 is used on both iPhone and iPad.
- (a) Android (b) Windows (c) **Apple iOS**
- 55 It is difficult to use the computer device and mobiles without
- (a) emails (b) **operating systems** (c) flash memory
- 56 gives commands to the computer in the form of codes that can be used to create animation.
- (a) **Programming language** (b) assistive technology (c) digital footprint
- 57 is a mobile operating system.
- (a) ROS (b) macOS (c) **iOS**
- 58 is the standard programming language used to create web pages.
- (a) Python (b) **HTML** (c) OSs
- 59 HTML describes the structure of a web page and consists of a series of elements such as headings, paragraph and
- (a) images (b) links (c) **both a and b**
- 60 HTML tags consist of an opening tag, a closing tag and
- (a) comments (b) **the content** (c) attributes
- 61 The HTML tag <p>.....</p> refers to
- (a) largest heading (b) subheading (c) **create a paragraph**
- 62 The tag is used to create the largest heading in HTML
- (a) <L1>.....</L1> (b) **<h1>.....</h1>** (c) <h6>.....</h6>
- 63 Large headings are placed at the of the web page to catch the attention.
- (a) middle (b) bottom (c) **top**
- 64 To make the text bold in HTML, you can use tag .
- (a) <p> (b) **** (c) <s>
- 65 Adding to the web page, attracts attention and triggers different emotions.
- (a) **images** (b) smallest heading (c) database
- 66 The abbreviation of Hyper Text Markup Language is
- (a) **HTML** (b) HTLM (c) THML

Question 02

put (√) or (×)

- 1 To connect devices without cables, we use wired networks.
- 2 Computer networks connect computers together to share important information and data.
- 3 Devices can be connected without wiring.
- 4 Switches don't send data to specific devices.
- 5 Wired networks use Wi-Fi to connect devices.
- 6 Switches help to make connections easier and faster.
- 7 Computers don't need network connection devices to transfer data.
- 8 A modem is a device that connects a LAN to the internet.
- 9 Wireless networks connect devices with physical wiring and cables.
- 10 ISPs provide signals that modems convert into digital signals.
- 11 Cables in wireless networks are plugged into holes called ports.
- 12 AI is unable to imitate the sounds of people by providing a tone of actual people.
- 13 Switches are intelligent devices.
- 14 AI applications can write an article on a topic.
- 15 Virtual reality can show a 3-D model of what the real world looks like.
- 16 Artificial intelligence is the computer's ability to think, learn, and deduce.
- 17 Virtual reality is a 3D environment that interacted with by wearing glasses.
- 18 Virtual reality combines the real world with a virtual world by adding images using computers.
- 19 Virtual reality is a virtual 3-D environment.
- 20 Futuristic technologies can't help people with disabilities.
- 21 Users often wear VR headsets that block out the real world.
- 22 Future technology can improve daily life.
- 23 Augmented reality helps students become active participants in learning.

- 24 There is no difference between augmented reality and virtual reality. ❌
- 25 Augmented reality can be done through mobiles and tablets. ✅
- 26 An AR app can show you how new furniture will look in your house. ✅
- 27 Disabled individual can use virtual assistants to make phone calls. ✅
- 28 Assistive technology helps people of determination integrate in society. ✅
- 29 User experience is always positive. ❌
- 30 Smart gloves are a type of assistive technology. ✅
- 31 Cutting-edge technology has transformed life in ways that were unimaginable even a decade ago. ✅
- 32 User experience doesn't describe how to use the product. ❌
- 33 Cutting-edge technology is the latest and most advanced version of a service or product. ✅
- 34 If the product is pleasant to look at and interact with, this makes the user experience positive. ✅
- 35 The development of products and services doesn't affect the user experience. ❌
- 36 Smart gloves empower blind people to translate their sign to spoken or text output. ❌
- 37 Cutting-edge technology helps people of determination. ✅
- 38 User experience can be positive if the product is practical. ✅
- 39 Usable product means the product is difficult to use. ❌
- 40 Copy, Cut, and Paste are from digital editing tools. ✅
- 41 EKB is an example of an unreliable website and is a database. ❌
- 42 Databases can be accessed for free through a school. ✅
- 43 A library catalog is a database which includes all the items owned by a library. ✅
- 44 All digital search tools give similar results. ❌
- 45 You choose the search tool based on the type of results you need. ✅
- 46 You can use the library's website on the internet. ✅
- 47 General databases provide information on a specific topic. ❌
- 48 Be sure the search result you select is credible and accurate. ✅

- 49 Author and journal title can be used to widen a search range in databases.
- 50 Search engines are user-friendly, very fast, and often give many results.
- 51 An operating system only manages a computer's software.
- 52 Android runs on Mac devices.
- 53 The ROS is closed-source software used for building robot applications.
- 54 Android is an open-source operating system.
- 55 Windows is open-source software that can be edited by anyone.
- 56 HTML is commonly used to create web pages.
- 57 Apple computers run on the Windows operating system.
- 58 Most computers come pre-loaded with an operating system.
- 59 Android operating system is used in iPhone and iPad.
- 60 Apple Car play is an operating system for self-driving cars.
- 61 Apple iOS uses closed-source software.
- 62 Similarities between programming languages facilitate learning them.
- 63 Self-driving cars don't need operating systems to perform.
- 64 Programming languages are usually closed sources.
- 65 HTML isn't compatible with the major web browsers.
- 66 The building blocks of web pages include only headings and paragraph.
- 67 HTML tags consist of two main parts.
- 68 The HTML tag `<h6> ... </h6>` refers to large heading.
- 69 The tag `<p>....</p>` is used to change text to bold.
- 70 The tag `<i> </i>` refers to change text to italic.
- 71 A paragraph usually has more than one sentence.
- 72 Web browsers have difficulty reading HTML documents.
- 73 We use the tag `<a> ` to create hyperlink.
- 74 Subheadings font size is larger than the heading.

- 75 Adding subheadings to web pages makes the text easy to scan, so a reader can find the information easily. ✓
- 76 The tag `<h1> </h1>` refers to subheading. ✗
- 77 HTML code can help people with low vision to distinguish between parts of a web page. ✓
- 78 To change the text to bold we use the ` ` tag. ✓
- 79 HTML elements break up web pages to make them easier to scan, read, and navigate. ✓
- 80 Web browsers read HTML documents and displays the content according to the HTML tag. ✓
